About Us

Specialised Coating Services is a subsidiary of Blastline India Pvt Ltd, an acknowledged leader in the surface preparation, protective coatings and corrosion control industry. The company functions as a one-stop shop for all your blasting and coating needs by providing everything from abrasives to blast machines, after coolers, airless spray equipment and all the necessary accessories, hoses and instruments.

Our manufacturing units are reputed for the development and production of high-quality blast equipment. We are the first and only manufacturers of ASME U-certified blast machines and air receivers in Kerala. We have abrasive manufacturing and processing facilities for steel shots, steel grit, garnet and copper slag located in various parts of India. Having our own line of equipment and abrasives allows us to deliver cost-effective solutions in a timely manner without compromising on our quality.

With over 30 years of experience in the surface preparation and coatings sector, we are able to leverage our expertise to offer reliable solutions for all your coating needs.

In-house Facility

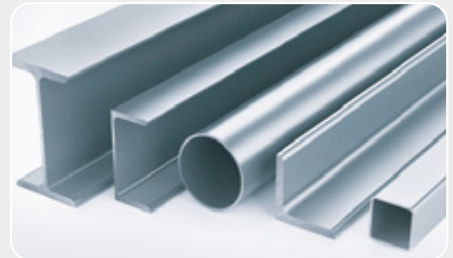

Blast Room

Paint Room

In-house Blasting and Painting for:

What do we do?

Surface Preparation for Coatings on:

- New MS Steel- Plates, Pipes, Channels, Angles, Valves, Fittings, Bolts, Nuts etc.
- Fabricated Steel Products - Pumps, Valves, Shafts, Tanks, Vessels, Marine Equipment, Skids (for Machineries), Pipes (External & Internal), Cooling Towers etc.
- Architectural Structural Components - Gates, Railing, Pargola etc.

Glass Beads Blasting for Surface Cleaning:

- Stainless Steel
- Aluminium
- Wood
- Fibre Glass

Maintenance Works

- Removal of Existing Coatings
- Surface Preparation of Corroded Steel

High Performance - Protective Coating Systems:

- Aluminium Pigmented
- Specialist in 100% solids coatings
- Enamels
- Zinc Coating
- High Build Epoxy
- PolyUrea
- Waterproofing
- Rubberlining
- Glassflake Epoxy Coating
- Polyurethane

Offsite Services

Our area of activities include:

Refineries, Fertilizers & Petrochemical Complexes, Storage Tanks, Silos, Steel Structures, Vessels, Bridges, Ships/Marine, Barges, Pipelines etc.

GRACO | **Vapour Abrasive Blasting**

The latest environmentally friendly way of vapour blasting mixes the abrasive with water to enhance the levels of surface finish. Vapour blasting can be used to restore concrete, steel and other surfaces while generating significantly less fugitive dust than dry blasting.

Visible Dust in Dry Blasting

No Dust in Vapour Blasting

**92%
Less Dust**

Features

Eco Friendly Blasting Anywhere

Open Blasting Anytime, Anywhere!

No Containment Sheet Required

Low Blasting Media Consumption

Work Done using Vapour Abrasive Blasting -Application

Statue Blasting

Monument Blasting

Metal Restoration

Component Blasting

Paint/Stain Removal

Rail Cart Blasting

Our Machine Setup

Portable Diesel Driven
Compressor

ASME 'U' Certified
Blast Machine

Airless Spray Pump

Training & Trade Testing

In association with Blastline Institute, we offer Blasting & Painting courses of varying lengths. Our courses cover both theory (topics: basics about corrosion, surface preparation, equipment design and set-up etc.) and practical training, where we offer hands-on training in our Blast Room and Paint Spray Booth facility.

Trade Tests can be conducted in our facility for Blasters, Painters, Welders and QC Inspectors.
